PROFESSIONAL SUMMARY

Product Designer and UX specialist with experience across enterprise systems, internal tools, insurance e-commerce, and consumer applications. Works across discovery, user research, interaction and visual design, responsive UI, design systems, UX writing, prototyping, usability testing, and engineering handoff. Currently provides Product Design expertise for AI model evaluation, applying structured criteria, detailed written rationales, and reviewer calibration to assess digital product and UX work.

PROFESSIONAL EXPERIENCE

Product Designer (Capgemini, assigned to Bradesco Seguros) | Oct 2024 - Present | Remote

- Design internal enterprise products for service-provider management, proposal formalization, notification management, and OPME operations.
- Lead user interviews, flow mapping, interaction and visual design, microcopy, high-fidelity prototyping, usability testing, and detailed Figma handoff. Keep solutions consistent with the existing design system and business and technical requirements.
- Use AI to synthesize research, draft microcopy, and build functional prototypes. Document flows, behaviors, requirements, and design decisions for product, stakeholder, and engineering review.
- For the notification-management product, user feedback indicated an 18% improvement in clarity and legibility, while closer stakeholder alignment reduced design rework by 20%.

Product Designer / UX Expert (Independent Contractor) | Mercor Intelligence | Aug 2026 - September 2026 | Remote

- Provide Product Design expertise to improve AI models for a leading AI research lab through Mercor Intelligence.
- Develop task-specific grading criteria for digital product and UX deliverables, including design systems, component libraries, responsive layouts and dashboards, end-to-end product flows, customer portals, UX writing, and design-to-engineering handoff.

Evaluate AI-generated and human work against those criteria, document evidence-based score rationales, and refine judgment through senior reviewer feedback and calibration.

Product Designer (Freelance) | Appstorm | Dec 2024 - Jan 2025 | Remote

- Redesigned Conecta, a nutrition app whose usability issues affected the customer experience and nutritionists' ability to monitor patient progress.
- Completed the redesign in four weeks through desk research, a CSD Matrix, qualitative interviews, impact-and-feasibility prioritization, high-fidelity interactive prototypes, and iterative usability testing.
- Users reported easier use and a more pleasant interface. Nutritionists described more efficient patient-progress tracking.

UX / Web Developer (Capgemini, assigned to Bradesco Seguros) | Jan 2023 - Sep 2024 |

Remote

- Led end-to-end design and responsive front-end implementation for insurance e-commerce products built with Innoveo, with a focus on usability and the purchase journey.
- Facilitated stakeholder reviews, translated requirements into responsive interfaces, contributed to the design system, and partnered with engineering through handoff and implementation.
- The implementation increased lead generation by up to 200% within the first six months.

ADDITIONAL DESIGN EXPERIENCE

UI/UX Designer Intern | 2021 | Fortaleza, Ceará, Brazil

- Contributed to UI and UX activities within a software engineering internship.

Product Design Volunteer Study Project | UX Unicórnio | Apr 2022 - 2023 | Remote

- Worked with a design team to research and simplify the Mobinft NFT purchase flow through quantitative and qualitative research, feature prioritization, wireframes, testable prototypes, and usability testing.

EDUCATION

MBA in AI-Driven Innovation and UX | Unifast | 2025 - 2027

Technology Degree in Digital Marketing | Descomplica | 2023 - 2025

Specialization in UX, UI and Product Design | UX Unicórnio | 2022 - 2023

Technical Degree in Information Technology | UNIVAP | 2018 - 2020

CERTIFICATIONS

Lean Six Sigma Yellow Belt | Yokoten | 2022

UX and Design Thinking: User Experience in Business | Udemy | 2021

SKILLS

PRODUCT DESIGN AND UX

Product discovery, user research, interviews, journey mapping, information architecture, task flows, interaction design, visual design, responsive UI, design systems, component libraries, prototyping, usability testing, UX writing, microcopy, design documentation, and engineering handoff.

AI EVALUATION AND WRITTEN REVIEW

Task-specific grading criteria, product critique, evidence-based scoring, written score rationales, reviewer calibration, AI-assisted research synthesis, and functional prototyping.

TOOLS AND TECHNOLOGIES

Figma, Figma Make, Adobe XD, Framer, Antigravity, Claude Code, Zaia, Innoveo, HTML5, CSS3, and JavaScript.

METHODS

Design Thinking, competitor analysis, CSD Matrix, impact-and-feasibility prioritization, Agile/Scrum, stakeholder facilitation, and cross-functional collaboration.
